

The Collections

Natumo 010

Rhythm of the scale

Natumo 010 is inspired by elegance of the natural world, and is thus timeless and beautiful. The repetitive forms of a scale reflects on this astonishing and unique tile. Gentle, organic curves alternate with strong contours harmoniously, following the rhythm of the overlapping layers of this specially crafted object.

The harmony of nature

From the smallest cells to the crown of the trees, we discover rules, repetitions, patterns which always impress us to create timeless and beautiful designs. We bring the harmony of nature into your home.

Natumo 021

Solid flora

The Natumo 021 celebrates the nature collection's form language. With a minimalistic yet rich look, the design and proportions reflect the unmistakable style of a Cavaril tile.

Light and Shadow

The ever-changing sunlight makes this delightful tile outstanding. The unique and contemporary look, and the overall rhythm of the wall is created by the triangles' play of light and shadow.

Clamo 026

Stunning and refined

Clamo 026 was inspired by the eternal and elemental form of architecture, the arch. It is the most beautiful example of man-made shapes and we have redefined it to a new level of beauty.

Mesmerizing details

Just stand and contemplate.
The richness of the details make the Clamo 026 so stunning and mesmerizing. We can dive into the form for a long time and always explore a new aspect of this tile, as we do with a sculpture on a historical building.

Clamo 048

Calm aesthetic

The cleanest and most authentic form of the fluting is represented on the Clamo 048 tiles. Charismatic and distinguished, and at the same time providing a calm and elegant backdrop to your life.

Beauty in the details

Take a closer look and you can find the delicate details of this timeless piece of our classic collection. The tactile shape is inviting us to touch and feel the smooth concrete surface.

Clamo 042

Beauty of fluting

The Clamo 042 is dignifying and sophisticated like an antique building. It is evoking one of the most beautiful elements of classical architecture, the rhythm of fluting, in a contemporary form. It is not ostentatious, or loud, but calm and elegant.

Play with the rythm

The slant edges and trims of the linear tiles give an unusual and unique rhythm to the pattern. You can make infinite variations with the use of the slant contours of the tile.

Geomo 011

A thousand shades of reflection

Geomo 011 is the smallest yet most detailed piece of our collection. The perfectly angled facets are guaranteed to give the wall a vibrant, glimmering look. Geomo 011 is simply a feast for the eyes.

Crystallized beauty

Gemstones are one of the earliest and most astonishing objects of wonder. We have been fascinated by the art of lapidary, the act of shaping minerals into man-made forms.

**Pick your favourite colour for
your tile**

All of our collection is available in every shade of the continuously refreshed Cavaril colour palette. You can choose the one, that perfectly matches with your ideas.

Timeless colour

Timelessness is on our minds during every step of our process. From sketching to colouring, we are thinking about the future. All of our through-body tiles are entirely composed of the same material and colour, from the top surface all the way through, so you can be sure that scratches and everyday wear and tear will not ruin the overall look of the wall.
